send all I can according to market. They go
safely anywhere in U. S. Don't eat until
butter soft.

CACTUS

The very curious and beautiful Cacti are
becoming more popular. The gorgeous
flowers are but little more attractive than
the plants themselves, which are always odd
and many have bright colored spines.

Culture. The following plants are natives
of mild climates and must be taken inside for
the winter. They will grow with very little
care in any size pot and will fill the pot. Don't
water too much.

In California grow outside as well as in-
doors.

ECHINOCEREUS. Cylindrical plants with
beautiful flowers and some have colored
spines. Varieties: *Dasycanthus* 25c, *Cloran-
thus* 25c, *Polycanthus* 35c, *Viridiflorus* 25c,
Stramineus 35c, *Fendlerii* 35c, *Ceasptosus* 40c,
Pectinatus 40c.

ECHINOCACTUS. Round or cylindrical
plants with showy flowers and sometimes col-
ored spines. Varieties: *Intertextus* (blooms
early January to March) 25c, *Horizonthalonius*
(Hedgehog) 25c, *Ferisii* 35c.

MAMILLARIA. Rounded in form with
spines on protuberances. Very showy, espe-
cially when in flower. The beautiful flowers
are freely born. Varieties: *Grahamii* 25c, *Tu-
berculosa* 25c, *Macromeris* 25c, *Echinus* 25c,
Micromeris 25c, *Lasiacantha* 25c, *Radiosa* 35c,
Sneedi 35c.

OPUNTIAS. Family of the prickly pear,
but not all have flat leaves. Varieties: *Cylin-
drica* 25c, *Frutescens* (beautiful small fruits)
25c, *Neo Arbuscula* (attractive small tree) 40c,
Kleinia (candle cactus) 35c, *Microdaisys* 35c,
Basilaria 35c, *Burbank's Spineless* fruiting
cactus, delicious, 4 varieties, large 50c, small
25c.

MISCELLANEOUS: *Epiphyllums*, mixed
25c, *Zygo Cactus Truncatum*, Christmas or
Crab Cactus, 25c to \$1.00. *Cereus Flagelli-
formis*, rat tail cactus, 25c. *Trichocereus Spa-
chianus*, tall slender, 50c. Collection, 20 var.
all labelled, \$3.00. 30 var. \$5.00.

TULIPS

Small Bulbs under ½ in., 100 for.....75c
One-half to ¾ in., 100 for.....\$1.00
Three-quarters to one inch, 100 for.....\$1.50

We have two varieties in above sizes. *Clara
Butt*, pink, and *Sultan*, red. Often bulbs under
½ in. will bloom. Over ½ in. will nearly all
bloom.

Large Bulbs. The following are 1 inch and
up. Price per bulb given. Multiply by 10 for
price per dozen. You need not send money

now. You will be notified when ready in the
Summer or Fall. No order filled for less than
\$1.00 unless 25c extra be included.

Bronze Queen, apricot-buff, 6c; **Clare Butt**,
best pink, 5c; **Eclipse**, orange and red, 6c;
Edmee, cherry-rose, silvery pink edge, 7c;
Farncomb Sanders, scarlet, 7c; **Gesneriana Ma-
jor Spathulata**, crimson-scarlet, 6c; **Ingles-
combe Yellow**, 6c; **King Harold**, Crimson ma-
roon, 6c; **Osmode**, red, 6c; **Psyche**, rose and sil-
very rose, 6c; **Remembrance**, silvery violet, 7c;
Rev. Ewbank, heliotrope lilac, 7c.

CUT FLOWERS AND DESIGNS

We make any design from a simple spray to
a bride's shower bouquet. We keep no flowers
in stock except in our own growing season, but
if you let us know in advance we can save you
money, especially on large orders for lodges,
weddings, etc.

A GLAD FAIRY TALE

A fairy came down to earth one day,
Wandered around and lost her way.
At last she reached the LaVerne Glad Farm
Where "Houdy" was creating Glads of charm.
The fairy forgot how sad she felt,
And close by the man's side watched and knelt.
Sometimes she would help him in his work
By giving the petals an extra quirk,
Or gathering tints from rainbow or sky,
Or velvet from wing of a butterfly.
Sometimes she would fashion a blotch or hue
Which seemed like an artist's dream come true.
She stayed for weeks and helped the man;
For thus do the fairies aid a good plan.
He half suspected, yet marvelled to see
What wonderful Glad flowers there could be.
And often, in looking my garden o'er,
Counting the favorites by the score,
There are certain exquisite blooms, I know,
Which plainly the fairy's work do show.

Leading in these is Los Angeles,
Sturdy, distinctive and certain to please—
A nice orange pink, not too dark nor too light,
But one which the whole world declares is just
right.

Lovely LaVerne makes me hanker and year
For more than one bulb, when one bloom I
discern.

Charming is Crepe, in fine texture and shape;
From the lure of its loveliness who could
escape?

A Glad with a soul is Mary Jane Coole—
She looks, lives and grows good by one Golden
Rule.

These are a few; there are others, as well,
Created at LaVerne by Houdyshel.

Benjamin Keech, Randolph, N. Y.

INTRODUCTION

This brief catalog is probably not as good a "salesman" as some of the beautiful catalogs that are sent out. Fine paper, beautiful color plates and illustrations, eloquent word pictures, nice chatty little talks which charm you into spending your money,—all are helpful in selling your product, whether it be bulbs, bureaus or bungalows. It's a real pleasure to read such a catalog and reluctantly I've had to abandon my intention of getting out a larger catalog. Here is the reason:

Today, January 29, I have just completed looking up descriptions, probable present values, etc., of about 100 varieties of Glads which we offer this year for the first time. Also made a thorough study of Iris values and prices; looked up a supply of interesting cactus and other plants; had several new cuts made, and in other ways planned for the catalog.

But January 29 is not the time to begin writing a catalog that was promised by February 15. Not only do I lack time for writing a more pretentious catalog, but there is a consideration which I believe closes the argument in favor of a very brief one. That consideration is economy. The saving I'll share with you.

Therefore, tonight I am sitting down at my kitchen table with a pot of coffee, a collection of price data and brief descriptions spread before me, and tomorrow morning I'll have things in shape for my printer.

(By the way, to my friends in the East I want to say that I've had no other fire except that necessary to stew myself a few apples and "bile" the aforesaid pot of coffee on a gas stove and with fire turned out some time ago the room temperature is 67 degrees.)

You just can't keep a Californian from bragging about his climate, can you? But it is unlucky to brag, and right here I'll turn modest. I'll not say that my prices are lower nor my bulbs better than those of my worthy competitors, most of whom I know and esteem. But I will say this: this business is about all I have in life—originating, growing and disseminating beautiful flowers is about all the opportunity for service to others that I have, and I am doing my best.

I am sure that I am offering you some wonderfully good bargains. Certain prices are wonderfully low. For example:

THE GLADIOLUS SPECIALS

These are bulbs that I have a very large stock of and which I must close out. And the

IRIS PRICES

I must admit are less than one-half of my last year's prices in most cases—sometimes only one-fifth. I am doing this without other purpose than to give my customers the opportunity of having the loveliest garden possible with the sum they have to invest. The necessity to transplant a matted acre field provides the opportunity.

I have neither the desire nor the expectation of establishing these as the prices for which they must be sold. Fine Glads at 3 dozen for \$1.00, good ones for \$1.00 per 100, or beautiful Iris at 5c to 25c per root could not very well be adopted as the permanent policy of a grower.

(Whew, what a sneeze! Guess I'll build a fire in the office, although it's perfectly warm and comfortable without one. Coffee always did make me sneeze. . . . Br-r-r-r; no, I am not trying to shimmy. . . . Um-m-m-, that fire feels good.)

Let's see, where was I? Oh, yes! What I mean to say is that we do have a lot of bulbs here—more than could be sold at usual prices on quite a number of items like the GLAD SPECIALS and the IRIS PRICES, and our purpose in fixing our prices on them has by no means had the purpose of affecting the market value of those varieties, which would not be fair to our competitors, but rather as a measure for the conservation of our resources of beauty and because I would rather give away our surplus, if necessary, than to destroy it.

On other items you will find my prices are very moderate and you will no doubt observe that I have tried to meet the lowest price fixed by other reliable growers.

But price is not the only consideration you will have when you buy your bulbs. You want **QUALITY FIRST** always, and in this respect let me say we aim to stand back of our bulbs. When they do not perform properly you need only to tell us in order to receive a fair adjustment.

TERMS OF SALE

NO C. O. D. ORDERS ACCEPTED.

POSTAGE STAMPS taken at 5% Discount.

POSTAGE PREPAID on orders over \$1.00 except where noted. Under \$1.00, send 15c extra.

TIME OF DELIVERY—Right now for Pacific Coast and South. Bulbs are not sent into cold countries except at purchasers' risk until about April 1.

OUR GUARANTEE—We aim to send out only true to name, healthy bulbs. Sometimes an employee may make a mistake, although we train them carefully. In case of error or reasonable cause of dissatisfaction we replace bulbs free.

We guarantee delivery and if your bulbs do not arrive within a reasonable time or a card giving time of delivery, please notify us. We will replace the goods or give others of equal value. We don't guarantee, of course, to refund your money if you forget to notify us or change your minds and decide you don't want the bulbs after they are sent.

THE 1929 CATALOG

contains fuller plant descriptions and culture directions; also a whimsical little story, "The Gladiolus Romance." Have only a few copies. Mailed for a 2c stamp.

GLADIOLUS

CULTURE: Plant large bulbs about three inches apart and same depth, in full sun. The rows may be as close as one foot to 18 inches.

Before planting, to insure the health of your bulbs, soak them one hour in a solution of one antiseptic tablet (mercuric bi-chloride) to a pint of water. Of use one ounce powdered corrosive sublimate to seven gallons water. Don't use metal container.

No fertilizer is required but one can use a tablespoonful superphosphate to a foot of row or handful ground sheep manure. Or well

rotted stable manure as mulch is good. Avoid manures, especially if fresh, in contact with bulbs.

Glads need lots of water all the time. If J. P. does not provide it every three or four days as they begin to show spikes, you should. I have seen half inch bulbs of Los Angeles make 5-foot spikes just by sprinkling a half hour or so every day.

CLOSING OUT ONE MILLION BULBS SPECIAL OFFER

For many years I have grown flowers wholesale. In the summer I have to start to Los

Angeles about 3 a. m. three to five times a week. As a result I have had little time to breed and originate.

I've decided to close out these bulbs and practically quit growing for market. They are fine bulbs two years old.

VARIETIES

LOS ANGELES and MIXED

25 EXTRA LARGE BULBS\$1.00
LARGE MEDIUM SIZE, 50 for.....\$1.00

BLOOMING SIZE

The varieties here are LOS ANGELES, VIRGINIA (best red) and MIXED.

You will be surprised how well small bulbs will grow and bloom if well tended. Plant one inch apart and two inches deep.

100 Blooming Size Bulbs for.....\$1.00
Small bulbs and bulblets are measured, not counted.

Still smaller, about No. 6, and many will bloom—

150 for\$1.00

ASSORTED SIZES

of Los Angeles will certainly bloom for a long time even from one planting, 60 for.....\$1.60

BULBLETS.—We have bulblets of some varieties at 25c per packet. No less sold. We give usually about ten bulblets for the price of one bulb.

Order before April 1, when all bulblets will be planted,—some before that. Will be glad to quote a price on a quantity list.

SIZES OF BULBS: L. means large bulbs over 1 inch, usually quite a bit over. M means medium, about $\frac{3}{4}$ inch, and S means small.

SUBSTITUTION. On some of our more rare varieties of Glads we have a very small stock and one cannot buy them wholesale anywhere. Therefore order early. We have found it pleases everyone to substitute when out. We can usually send something similar and always give as good or better value. If you do not agree to this please say NO SUBSTITUTION.

PRICES are per single bulb. One dozen costs ten times one bulb. Half dozen at dozen rate. One hundred bulbs cost 75 times price of one bulb.

If you grow flowers or bulbs to sell send for Wholesale Bulletin No. 6.

Lena Graetz (Graetz), White	10c
Lilac Wander (Gru), Early lilac-lavender self	25c
Longfellow (Pr), New self-colored pink.....	15c
Los Angeles (Houdyshel), Pg. Grenadine or orange toned pink with orange-carmine throat blotch. Always included in a list of the world's most important and popular 25 Glads. Known as the "Cut and Come Again" Glad because after the first spike is cut if the leaves be left on and good culture continued new spikes are produced from the old stumps. Owing to this ability and the large number of stems from one bulb (sometimes 6 to 10) and to the numerous lateral spikes on each main stem, the Los Angeles blooms through a long period. A field usually gives me flowers for three months. Hence I believe the Los Angeles is the nearest	

EVERBLOOMING

though not literally so, as that is impossible.

It is also the greatest producer of flowers. We have a dried plant in our office which has 80 blooms and buds on one spike with its six laterals and sub-laterals. The bulb produced three main spikes—probably over 225 florets from one bulb.

The Los Angeles won the "Award of Merit" at Harlem, Holland.

It is rapidly becoming the most important Florists' Glad either for forcing or field culture. If you want to grow flowers to sell, send for my Wholesale Bulletin No. 6.

Prices: Jumbo (over 2 in.) 15c, per doz. \$1.00. L. 8c, per doz. 50c. One-inch bulbs 6c, per doz. 50c. M. 35c per doz. S. 15c per doz, or \$1.00 per 100.

These small bulbs bloom the first year.

Bulblets \$1.00 per 1000. Jumbo size bbs. that mostly bloom the first year \$2.50 per 1000.

Louis Bourmaster (He), Light purple.....	\$1.25

Yvonne (Vel), Lovely rose, lilac blotch.....	30c

IRIS

Better order your iris now at the following "closing out" prices. We expect to sell all but ten to a hundred of each variety.

Spring and early summer is the best time to plant either east or west, as the plants will form large blooming clumps by the next spring. If planted in the fall they do not.

Plant one inch deep and one foot apart. They prefer full sunlight, but light shade for part day is good. Isolene prefers some shade.

The descriptions must be brief and therefore do very slight justice to each flower. Two descriptions are given for the first variety to illustrate how incomplete the others are.

A. E. Kunderd (Fr), S. Yellow-bronze; F. Magenta red.....	20c
Complete description: S. yellow bronze, tinged and blended with magenta; F. Magenta-red blended with bronze; retic- ulated yellow in the center; orange beard; very fragrant.

IRIS COLLECTIONS

If it puzzles you, let us make the selections. By putting up many collections at a time and especially if labels are not wanted, we reduce the price very much.

	Not Labeled	Labeled
25 varieties Iris	\$ 1.00	\$ 1.50
40 varieties Iris	1.75	2.50
50 varieties Iris	2.25	3.25
75 varieties Iris	6.00	7.50
100 varieties Iris	13.00	15.00
150 varieties Iris	22.00	25.00

The exquisite beauty of new, modern Iris can now be yours.

AMARYLLIS FAMILY

These are all gorgeous tropical bulbs and may be grown outdoors in California or semi-tropical climates, or in pots about 3 or 4 times the diameter of the bulb in the East.

They may also be grown outside in cold countries if lifted with dirt attached and stored in frost proof room over winter. N. B. Amaryllis Belladonna and Nerine Sarniensis are not ready to send until June.

Chlidanthus Fragrans, Fragrant yellow Amaryllis, April 15c; 4 (for 6 in. pot) 45c

Amaryllis Johnsonii, Dazzling red flowers, white stripe, in April. 25c each. Extra large.....35c and 50c

Amaryllis Formosissima, wonderful vivid scarlet.....20c

Amaryllis Belladonna, Pink flowers in August.....20c

Mixed Hybrids, colors from nearly white to red mixed, not separate.....75c

Nerine Sarniensis, Delicate pink flowers in August.....25c

Pancratium Maritimum, Fragrant white flowers similar to Ismeme but much better bloomer.....20c, 3 for 45c

The CRINUMS have fragrant lily shaped flowers in large umbel. Most of them will bloom two or three times a year. If you set yard in June a large bulb usually blooms right away. The bulbs are very large up to several pounds. If we prepay postage we send medium size that we expect would bloom first year, maybe at once. But for the same price we will send you extra large bulbs if we may send by express collect or C. O. D. for postage. If you prefer you may estimate postage, but don't send 5 cents for postage on a dozen bulbs as one customer did. Large bulbs weigh 2 to 4 pounds. Ask your postmaster how much that weight would cost.

C. Cecil E. Houdyshel, Deep pink. Nearest red and practically everblooming. Also the most hardy. Think it might live over winter in favored sections if well protected by mound of earth or leaves.....50c

C. Capense Rosea, Pink.....20c

C. Kirkii, White, red-purple stripe.....25c

C. Moorei, Pink, prefers light shade.....25c

C. Pedunculatum, White flowers like spider lily. Very large bulbs. Postage or express extra.....\$1.00

C. Powellii Alba, White.....25c

C. Powellii Rosea, Pink.....25c

C. C. J. Harvey, Wonderful pink hybrid.....50c

MISCELLANEOUS

Tritoma, Hybrids. Mixed colors.....15c

Calla Lilies, White.....15c to 25c

Cannas, Mixed or named.....10c

Washington Fan Palms, 2 to 4 feet.....\$1.00 Express extra. Call at ranch and take them for 50c.

Physalis Chinese Lantern Plants.....2 for 25c

Walnuts—We grow good nuts. Sent by express collect or C. O. D. for postage. If you ask your postmaster he can tell you amount to send for 5 lbs. 5 lbs. for \$1.00

Avocados. Crop failure makes them very high. Send \$1.00 any time and we will do our best on price. Just now they are \$1.00 per pound net. Later likely \$1.50. In September our new crop will likely be very reasonable, say 25c to 35c per lb. net. (Postage and packing extra).

This wholesome and delicious fruit contains no acid or sugar but much oil. It is used in salads or sandwich spread. Combined with tomatoes, lemon juice, or sauce in a salad, it's something to rave about. Some people have to acquire the taste.

There is an abundance of certain peculiar vitamins and mineral salts in avocados that give them a far more potent effect than any drug in revitalizing, restoring and rejuvenating over-worked, elderly and recently convalescent persons. If you find a raw food diet advisable here is a very easily digested food very rich in fat and albumen.

Save this catalog as a reminder and send me \$1.00 next September to January, which is the season when they are cheapest. Will
